1999-2019

TWENTY YEARS is a drop in the bucket by some measures, and an eternity by others. Internally, our 20th anniversary is the same way. Two decades ago, in 1999, a young Richard Fitzpatrick risked his life savings to produce something he believed in—the original Magpul—and started selling it out of his basement. Time has sprinted by, and it sometimes seems like just the blink of an eye. When we take a look back at what has happened in that span, however, it has indeed been a marathon of constant effort, and it could be argued that we should make a pretty big deal out of it.

Although founded on a single product, Magpul was formed with greater things in mind. A mere glance at the marketing booklets of the day showed that our Founder was working towards a more transformative vision than that which could be confined to any one item. With a focus on innovation, simplicity, real value and efficiency, Magpul was and is an approach, an attitude and a mindset more than anything. From the early days of being a one-man show, to moving into an unheated pole building and hiring the first employees, and on through the meteoric growth to the current efforts, the focus has remained the same.

Over the years, Magpul's industry-changing AR products redefined the shooting experience for millions of firearms owners, and raised expectations of what reliability really meant. The PMAG GEN M3 is now the official magazine of most of our Nation's Armed Services, and goes into combat with all of them. Our

later expansion into other firearms and their related accessories resulted from identifying those shortcomings in other platforms and products where our materials and engineering expertise could create value. Hundreds of products now comprise our line, with each one representing a significant outlay of dedication, effort and innovative thinking by the a Magpul team that has grown in size and capability over the years.

But, we're not much for looking backwards for too long. The reality for us is that this 20th Anniversary of our founding is a milestone, not a destination. While we are immensely proud of the things that Magpul has accomplished and extremely grateful to our Founder for the opportunities he created for the rest of us with that gamble long ago, this occasion is an opportunity to briefly appreciate those accomplishments over the last twenty years and then challenge ourselves to do more in the next twenty. So, we will indeed be hoisting a glass to mark this occasion, and we'd welcome all who would do so with us; after all, the customer has made this possible and is whom we ultimately serve. Join us as we toast our past, but then also join us to take a look at what 2019 and beyond will bring on the following pages. Our promise to you is that our focus will continue to remain on "what's next" and on creating more solutions, more innovation, and ultimately, more to celebrate at the next milestone.

MAGPUL PRO 700L

REMINGTON 700 LONG ACTION

Like the Pro 700, the Magpul Pro 700L rifle chassis is an uncompromising, full featured precision rifle chassis for long action Remington 700 actions and other Remington 700 footprint long actions. The Pro 700L combines innovative engineering, precision machining, Mil-Spec quality finishes, and an extensive list of purposeful design features with complete adjustability to provide demanding end users with the most comprehensive available precision rifle platform solution for true out of the box performance. Based on a full billet aluminum skeleton and clad in Magpul polymer for environmental comfort, noise mitigation, and ergonomics, the Pro 700L is also fully ambidextrous. Capable of fitting both right and left handed actions with the simple swap of a bolt-cutout plate, and with a reversible cheek riser and reversible hinge on the folding version, "lefties" haven't been "left out."

M-LOK DOVETAIL ADAPTER

2-SLOT, 4-SLOT & PRO CHASSIS FULL RAIL FOR RRS/ARCA

The Magpul M-LOK Dovetail Adapter comes in 2 Slot, 4 Slot, and Magpul Pro Chassis Full Rail options that interface with your RRS/ARCA accessories, including your quick disconnect ball heads, bipods, and tripods. Constructed of lightweight, Mil-Spec, hard anodized aluminum mounting plates for M-LOK slot-compatible hand guards, they have comfortable, yet functional, snag-resistant beveled edges. In addition, the rear of the 4 Slot and the Pro Chassis Full Rail Dovetail Adapters also include a hardware access point that allows easy removal of the front action screw on a rifle mounted to a Magpul Pro 700/700L chassis without the need for removal of the Dovetail Adapter from the chassis. The full length rail also adds two M-LOK slots for M-LOK compatible bipods and other accessories.

PMAG D-50 LR/SR GEN M3

GEN M3

7.62 NATO / .308 WINCHESTER

7.62 x 51

The Magpul PMAG D-50 LR/SR GEN M3 is a durable, lightweight, highly reliable 7.62x51 NATO/.308 Winchester 50-round drum magazine for SR25/M110 pattern rifles, and is capable of using longer-than-SAAMI-spec match ammunition, up to 2.830" OAL, such as M118LR. The Magpul PMAG D-50 LR/SR boasts many of the same features as its 5.56 predecessor while providing the end user with a similar magazine capacity increase. Boasting a 50-round capacity, the unique drum configuration keeps the height of the magazine manageable, allowing for prone firing and easier storage. The slip-on, semi-rigid Dust Cover prevents grit and debris intrusion during storage and transport. Use of the Ratcheting Loading Lever removes tension from the spring for easy loading, and a translucent window and high-visibility follower allow rounds remaining indication at a glance. Bolt hold open feature reliably locks the bolt back on the last round on SR25/M110 rifles.

MAGPUL BIPODS

FOR M-LOK, 1913 PICATINNY RAIL & A.R.M.S. 17S STYLE

The Magpul Bipod for M-LOK, 1913 Picatinny Rail, and A.R.M.S. 17S style interfaces offers strength, versatility and a robust feature set at a price that provides unmatched value. A low-profile combination of machined aluminum, steel, and our engineered polymers, the Magpul bipod legs can handle loading forces that cause other bipods to fail, can be deployed rapidly and simultaneously, and quickly adjust from approximately 7" to 11" of height. A deeply knurled locking knob allows positive tension adjustments for both pan and tilt, and the hub can be reversed to lock out the pan feature, if desired. Durable, conical feet provide a sure grip on most surfaces, and can be replaced with any Atlas-pattern aftermarket feet. All these features weigh in at under 11 oz, in either black or FDE.

RLS SLING

Building on the heritage and proven performance of Magpul's MS Sling series, the Magpul RLS (Rifleman Loop Sling) is a two-point, durable, lightweight, and affordable shooting aid and retention device. Combining the best features and proven attributes of Rhodesian and 1907 match-style slings, the RLS was created with Magpul's famous proprietary nylon mesh webbing and high-strength injection molded polymer hardware to ensure a lifetime of flawless use in the most rugged of environments. The speed and security of utilizing the RLS as a tensionable forward loop shooting aid lends itself to efficient, repeatable and effective usage in a competition, plinking or hunting environment with ease.

PMAG 35 EV9

CZ SCORPION EVO 3

9x19

The PMAG 35 EV9 is a lightweight, 35-round, 9x19mm CZ Scorpion EVO 3 compatible magazine. The PMAG 35 EV9 utilizes optimal round stack geometry, providing the large format pistol, PCC, and SMG market with Magpul reliability and increased magazine capacity in a pistol caliber magazine. Features include advanced impact-resistant polymer construction, an easy to disassemble design, and a highly impact-resistant floor plate. Additionally, the PMAG 35 EV9 features a rounds remaining capability in the form of capacity indicator windows at 10, 20, 30, and 35 round intervals. A Paint Pen Dot Matrix is provided for magazine identification, and the ridged front and back straps on the magazine body provide a secure grip in all environmental conditions. The PMAG 35 EV9 provides the CZ Scorpion EVO 3 owner with the design, reliability and durability expected from Magpul, all at a competitive price point.

MOE-EVO ENHANCED MAGAZINE RELEASE

CZ SCORPION EVO 3

MCE

The Magpul MOE-EVO Enhanced Magazine Release is a reliable, durable, and affordable ambidextrous upgrade to the standard magazine release for the CZ Scorpion EVO 3 family of pistols and carbines. Carefully considered interface geometries and surface texture on the paddle and wings allow for easy, one-handed activation and magazine removal, maximizing economy of movement, while remaining unobtrusive. The Magpul MOE-EVO Enhanced Magazine Release allows the shooter to readily release the magazine and is easily accessible with the firing-hand index finger or the reloading hand thumb.

EYEWEAR

From the beginning of the eyewear project, Magpul has used a list of mission-driven requirements to dictate design, material construction, and manufacturing methods.

The goal of each design is to be both simple and intuitive. By incorporating ergonomic considerations, a proper user interface, and subtle visual and tactile features, we have created an eyewear line that exceeds the needs of our core customer.

Features and designs that are common to all models:

- Z87+ and Mil-Spec rated ballistic lenses/frames
- TR90NZZ frame material
- Lightweight construction
- Highly flexible temples
- Low profile temples designed to integrate with over the ear hearing protection and communication headsets
- Anti-slip rubber nose and temple pads
- Oleophobic treatment of lenses provides liquid and other chemical protection and added scratch resistance
- Anti-reflective coating on inside of lenses minimizes distracting reflections
- Polarized lenses available in all models

SHOT 2019

MAGPUL RADIUS

The Radius was designed with the shooter in mind for maximum coverage and ballistic protection. Providing Z87+ ballistic protection and tested to MIL-PRF-32432 ballistic standards, the Radius is constructed of injected-molded TR90NZZ for maximum impact resistance, flexibility, and comfort. The aggressive eight-base wrap and high-coverage temples ensure your eyes will be protected from both the sun and debris while also providing all day comfort.

SHOT 2019

MAGPUL EXPLORER XL

The Explorer XL is a robust, visually impactful design optimized for medium and large faces. A thicker frame, sculpted lines, and defined corners give the Explorer XL an edgier, more pronounced style that is rich with features. Constructed of injected-molded TR90NZZ, the Explorer XL provides maximum impact resistance, flexibility, and comfort, and has been tested to MIL-PRF-32432 ballistic standards.

MAGPUL EXPLORER

The Explorer is a casual design that incorporates high performance features for those times when you want both protection and style in your life. With the same lens and frame construction and materials as the Terrain and the Summit, the Explorer provides extreme impact resistance, durability, and flexibility in a more lightweight package you can wear everywhere.

MAGPUL TERRAIN

The Terrain is designed for our most demanding customers, and it's well suited for those who require ballistic and safety protection for maximum coverage in a larger frame. With its polycarbonate lenses and frames constructed from TR90NZZ, the Terrain provides extreme impact resistance, durability, and flexibility in a lightweight package.

MAGPUL SUMMIT

Designed for our most demanding customers, the Summit provides premium ballistic and safety rated protection in a smaller frame than the Terrain. Its TR90NZZ frames and polycarbonate lenses combine to create the same extreme impact resistance and versatility as the Terrain, but with a smaller fit and coverage.

MAGPUL LIMITED EDITION FRAME LOCK - RIGGER

The Rigger is a rugged, limited edition, precision-engineered cutting tool constructed of premium materials and featuring our signature Magpul form and function. The first ever Limited Edition Frame Lock is designed completely by Magpul, and its features are an expression of Magpul's design ethos and commitment to innovation. A lightweight double-locking titanium frame reinforces the Rigger's strength, and custom-textured, lightweight titanium or Micarta scales provide a powerful grip. The robust modified Wharncliffe blade is forged from CPM S35VN stainless steel, considered to be one of the finest blade steels in the world and one of the first to be designed specifically for knives.

Featuring an innovative secondary locking feature (SLF), the Rigger's precision-machined frame lock prevents accidental blade closure in the harshest of environments and demanding use. A jimped blade flipper deploys and locks the modified Wharncliffe blade, which features an aggressive point for detailed work and a beefy spine for added strength. The CPM S35VN stainless steel blade material is extremely durable and holds an edge longer than lesser steels, reducing the need for frequent sharpening. The titanium pocket clip features a hollow pocket clip screw for lanyards, and is removed or reversed with a slotted screwdriver for easy disassembly and cleaning. The sleek, modern profile insures the Rigger rides comfortably in most any pocket, and at 7.59 inches open and 4.52 inches closed, it's an ideal size for everyday carry, yet large enough to handle demanding field tasks.

The Rigger comes with a custom high strength, injection-molded, soft foam lined, weather resistant case. Inspired by the PMAG, the Rigger's case also features a pen dot matrix for easy identification and marking. The Magpul Limited Edition Frame Lock will be offered in a short series of production runs, limited to 200 serial numbered knives per run, making the knives highly collectible. Each version is aesthetically unique, yet all are undeniably Magpul.

& MAGAZINE ENHANCEMENTS

THE MAGAZINE. WE ASK A LOT FROM THIS LITTLE BOX, WITHOUT WHICH OUR FIREARMS BECOME FAR LESS USEFUL. THIS “SIMPLE” FEEDING DEVICE CAN EASILY BE TAKEN FOR GRANTED...UNTIL IT DOESN'T WORK.

Magpul first entered the magazine market in 2007 with the PMAG 30, bringing to it the same philosophy it had brought to its other products; to bring simple, reliable innovation in military grade products where neither simplicity nor reliability were standard. From the start, the idea of introducing a serious polymer magazine into the world was met with skepticism and, sometimes, outright hostility from many who couldn't bring themselves to believe that something not made of metal could outperform and outlast the issued USGI AR15 aluminum magazine. In the end, a magazine needs to do several things well to be called reliable; it needs to feed as closely to flawless as possible in all compatible platforms under both normal and adverse conditions, and it needs to resist damage due to rough handling, abuse, impacts, and other hazards of extreme use. Reliability then translates to fewer events where the user is exposed to danger due to stoppages, and increased lethality to our enemies thanks to uninterrupted firing. The PMAG 30 immediately proved worthy of the claims of its reliability, and it quickly gained momentum and loyalty among both military and civilian shooters alike in both battle and range-tested firing.

While the PMAG wasn't the first polymer AR-15 magazine, it was the first one that you could rely on to function time after time after time. With its initial success, it became clear that the engineering and materials composition of the PMAG could transform a market that was littered with mediocre performers. Building on the success of the initial PMAG design, ingenuity and performance enhancements were spread across a wide variety of platforms in the Magpul line with similar successes. In a variety of calibers, fitments, and magazine designs ranging from traditional to pistol to drum, the PMAG line rapidly took ownership of customer loyalty through results. After years of enhancements, internal testing and working with end-users, the results of multiple rounds of rigorous US Government testing pointed to only one highly reliable, near-zero stoppage magazine in the entire marketplace; the GEN M3 PMAG. Hundreds of thousands of rounds later, the PMAG has proven itself to be the single-most reliable magazine made and the gold standard by which all others are judged. To highlight this fact, in 2017 all four US military services, USSOCOM, and the US Coast Guard either fully adopted or accepted the PMAG as their primary magazine offering.

At Magpul, our entire line of magazines is designed, manufactured, and tested to exceed anything you're likely to ask of them, using demanding scientific testing procedures that go beyond what others consider "requirements," to include a decade on the battlefield as the most-fielded polymer magazine for the AR15/M4 family of weapons platforms. We have taken the requirements for reliability and hammered them into existence in an entire line of products that are not just the standard for the industry, but also the world.

PMAG GEN M3 VS. GEN M2 MOE

The GEN M3 series is in its seventh year of production, and has proven to be the most reliable, durable series of magazines available for the AR platform in both internal and third party testing, to include the US Government. Reflecting on the last decade is encouraging, but focusing on the next decade is what drives us at Magpul. The PMAG line will endure and expand as it always has.

GEN M3

MEDIUM COYOTE TAN (MCT)
AVAILABLE IN MAG556 | MAG557

Engineered to combine the unmatched performance of the PMAG 30 AR/M4 GEN M3 Window and the desired color for the U.S. Army's Small Arms Weapons Neutral signature reduction program.

GEN M3 FEATURES

- ANTI-TILT, SELF-LUBRICATING FOLLOWER FOR INCREASED RELIABILITY AND OPTIMIZED PRESENTATION ANGLE
- OVER-TRAVEL INSERTION STOP ON THE SPINE
- OPTIONAL ANTI-GLARE TRANSLUCENT MAGLEVEL WINDOWS ON BOTH SIDES OF THE BODY ALONG WITH A PAINTED INDICATOR ON THE SPRING ALLOWS FOR EASY DETERMINATION OF ROUNDS REMAINING FROM 1 TO 30
- FLARED FLOORPLATE AIDS MAGAZINE HANDLING AND DISASSEMBLY YET IS SLIM ENOUGH FOR USE WITH MANY DOUBLE AND TRIPLE POUCHES
- PAINT PEN DOT MATRIX PANELS ON THE BOTTOM OF THE BODY TO ALLOW FOR IDENTIFICATION MARKING
- RIBBED GRIPPING SURFACE AND NEW AGGRESSIVE FRONT AND REAR TEXTURE FOR POSITIVE MAGAZINE HANDLING
- CONSTANT-CURVE INTERNAL GEOMETRY FOR SMOOTH FEEDING
- NEXT-GENERATION IMPACT AND CRUSH RESISTANT POLYMER CONSTRUCTION

The Magpul Original Equipment (MOE) is a line of firearm accessories designed to provide a high-quality, economical alternative to standard weapon parts. The MOE line distinguishes itself with a simplified feature set, but maintains Magpul engineering and material quality. The GEN M2 MOE is identical in form and function to the older model PMAG except that the optional Impact/Dust Cover is now sold separately.

MOE

HOW THE PMAG MAGLEVEL WORKS

The MagLevel round indicator system allows for visual verification of a magazine's loaded round count via a bright orange indicator coil. By incorporating a window on both sides of the magazine, it is easily used by both right and left handed shooters. The indicator coil and window give the user an indication of remaining rounds until the magazine is empty rather than losing all indicators when the round stack enters the magazine well, as in other "visible round count" systems.

MAGLEVEL — ORANGE INDICATOR COIL POINTS TO ROUNDS REMAINING IN MAGAZINE

GEN M2 MOE FEATURES

- ANTI-TILT, SELF-LUBRICATING FOLLOWER FOR INCREASED RELIABILITY
- IMPACT AND CRUSH RESISTANT POLYMER CONSTRUCTION
- OPTIONAL TRANSLUCENT MAGLEVEL WINDOWS ON BOTH SIDES OF THE BODY ALONG WITH A PAINTED INDICATOR ON THE SPRING ALLOWS FOR EASY DETERMINATION OF ROUNDS REMAINING FROM 1 TO 30
- TEXTURED GRIPPING SURFACE FOR POSITIVE MAGAZINE HANDLING
- FLARED FLOORPLATE FOR POSITIVE MAGAZINE HANDLING AND EASY DISASSEMBLY
- CONSTANT-CURVE INTERNAL GEOMETRY FOR SMOOTH FEEDING
- OPTIMIZED FOR USE WITH COLT-SPEC AR15/M4 FIREARMS

PMAG 30 AR/M4 GEN M3 & PMAG 30 AR/M4 GEN M3 W
MEDIUM COYOTE TAN (MCT)

AVAILABLE IN MAG556 | MAG557

Engineered to combine the unmatched performance of the PMAG 30 AR/M4 GEN M3 Window and the desired color for the U.S. Army's Small Arms Weapons Neutral signature reduction program.

PMAG AR/M4 GEN M3

5.56 NATO / .223 REMINGTON

The PMAG 40, 30 Window, 30, 20 and 10 AR/M4 GEN M3 are durable and reliable 5.56x45 NATO/.223 Remington polymer magazines for AR15/M4 compatible weapons. They feature an over-insertion stop, stainless steel spring, four-way anti-tilt follower, constant-curve internal geometry for reliable feeding, and simple tool-less disassembly to ease cleaning. Aggressive ribs and front/rear texture give positive control in all environments, and a paint pen dot matrix on the body allows easy marking for identification. A flared floorplate aids extraction and handling of the magazine while providing improved drop protection, and is slimmer than earlier generations for better compatibility with tight magazine pouches. Also compatible with a wide range of platforms such as the HK 416, MR556A1, M27 IAR, British SA-80, FN SCAR MK 16/16S, and others.

PMAG AR/M4 GEN M2 MOE

5.56 NATO / .223 REMINGTON

The PMAG 30 and 30 Window AR/M4 GEN M2 MOE are durable and reliable 5.56x45 NATO/.223 Remington polymer magazines for AR15/M4 compatible weapons. They feature impact resistant polymer construction, easy to disassemble design with a flared floorplate for positive magazine extraction, resilient stainless steel spring for corrosion resistance, and an anti-tilt, self-lubricating follower for increased reliability. Otherwise identical to the standard PMAG 30 AR/M4 GEN M2 MOE, the PMAG 30 AR/M4 GEN M2 MOE Window features transparent windows on both sides of the body and has a painted indicator on the spring for quick determination of approximate rounds remaining in the magazine.

FOR MORE INFO GO TO MAGPUL.COM

PMAG D-60 AR/M4 GEN M3 GEN M3

5.56 NATO / .223 REMINGTON

The PMAG D-60 AR/M4 GEN M3 is a durable, lightweight, highly reliable 60-round 5.56x45 NATO/.223 Remington polymer drum magazine for AR15/M4 compatible weapons. With a larger capacity than previous PMAGs, the PMAG D-60 gives the shooter 60 rounds of ammunition, effectively allowing the same round count as two standard capacity 30-round magazines without requiring a critical reload. The unique drum configuration keeps the height of the magazine manageable as well, allowing prone firing and easier storage. Features a paint pen dot matrix for easy marking and a rear window for instant capacity indication. Compatible with a wide range of NATO firearms such as the M4, M16, SCAR MK16/16S, HK416, MR556, M27 IAR, and others.

PMAG 30 AR 300 B GEN M3 GEN M3

7.62X35 / .300 BLACKOUT

The PMAG 30 AR 300 B GEN M3 is a purpose-designed magazine for rifles chambered in 300 Blackout. Since its inception, 300 Blackout shooters have had to use a magazine designed for another cartridge, limiting its ultimate performance and compatibility. One of the nice features of 300 Blackout is the compatibility with 5.56x45mm parts, but with the magazine it is a compromise to do so. Due to the wide variety of projectile weights and profiles potentially decreasing overall reliability, a dedicated 300 Blackout magazine was a logical step for the PMAG line.

PMAG LR/SR GEN M3 GEN M3

7.62 NATO / .308 WINCHESTER

The PMAG 25 M118 LR/SR GEN M3 Window (7.62x51/.308 Winchester) is a lightweight, cost effective, high reliability magazine for SR25/M110 pattern rifles using longer than SAAMI-spec match ammunition up to 2.830" OAL. Features true 25-round capacity, constant-curve body, anti-tilt follower, snap on Impact/Dust Cover, and transparent MagLevel windows to allow rapid visual identification of approximate number of rounds remaining. The PMAG 25 Window, 20 and 10 LR/SR GEN M3 (7.62x51/.308 Winchester) are lightweight, cost effective, high reliability magazines for SR25/M110 pattern rifles featuring constant-curve body, anti-tilt follower, and snap on Impact/Dust Cover. Designed specifically for SAAMI-spec ammunition, the PMAG 25 LR/SR also features transparent MagLevel windows to allow rapid visual identification of approximate number of rounds remaining.

PMAG 30 AK/AKM GEN M3

7.62X39MM

GEN M3

The PMAG 30 AK/AKM GEN M3 is a lightweight, high reliability 30-round polymer magazine for 7.62x39 Kalashnikov pattern rifles (AK-47, AKM, AKS, SIG556R and others.) It features steel-reinforced locking lugs and front spine, removable floorplate, constant curve geometry, and a high-reliability/low-friction follower for the performance and military-grade durability you expect from a PMAG. Magazine counts as three US compliance parts for 922r.

AK/AKM MOE

7.62X39MM & 5.45X39MM

MOE

The PMAG 30, 20 and 10 AK/AKM MOE are lightweight, high reliability polymer magazines for 7.62x39 Kalashnikov pattern rifles (AK-47, AKM, AKS, SIG556R and others). They feature a removable floorplate, constant curve geometry, and a high-reliability/low-friction follower for the performance and military-grade durability you expect from a PMAG.

In 2017 Magpul began shipping the latest addition to the AK MOE magazine family, the PMAG 30 AK74 MOE. Featuring the same design elements, the PMAG 30 AK74 MOE is an inexpensive, lightweight, high reliability 30-round polymer magazine designed for Kalashnikov pattern rifles in 5.45x39mm (AK74, MPi-AK-74N, PA md. 86, and others). These magazines count as three US compliance parts for 922r.

PMAG GL9

9X19MM PARABELLUM

GL9

The PMAG GL9 family of magazines for Glock 9mm handguns feature a new proprietary all-polymer construction for flawless reliability and durability over thousands of rounds. High visibility controlled-tilt follower, stainless steel spring, easily removable floorplate for cleaning, paint pen dot matrix for mag marking, ridged floorplate edges for better grip, and capacity indicator windows. All with the same boring reliability you expect from an OEM magazine.

AICS SHORT ACTION

7.62X51 / .308 WINCHESTER

The PMAG 5 and 10 7.62 AC are reliable and durable polymer magazines for .308 Winchester based family of cartridges and is compatible with short action AICS-spec bottom metal, to include the Bolt Action Magazine Well for the Hunter 700 Stock. Featuring GEN M3 technology, a paint pen dot matrix for visual identification, and a flared base plate for positive control and ease of retrieval, the PMAG 5 and 10 7.62 AC set a new standard for bolt action magazines.

The PMAG 5 7.62 AC, follower can be easily modified by the user to increase the capacity to six rounds for field, competition, or combat use.

AICS LONG ACTION

ACIS LONG ACTION

The PMAG 5 AC L, Standard and PMAG 5 AC L, Magnum are reliable and durable polymer magazines for .30-06 based family of cartridges and .300 Winchester Magnum based family of cartridges and are compatible with long action AICS-spec bottom metal, to include the Bolt Action Magazine Well 700L for the Hunter 700L Stock. Built using M3 technology, these magazines are advanced in both material and manufacturing processes providing an economical, lightweight, durable and reliable single-stack bolt action magazine solution. They come standard as 5-round capacity magazines for hunting regulation compliance.

The PMAG 5 AC L, Standard follower can be easily modified by the user to increase the capacity to six rounds for field, competition, or combat use.

PMAG 30G MAGLEVEL-HK G36

5.56X45 NATO

The PMAG 30G MagLevel (5.56x45 NATO) is a durable, lightweight, high reliability 30-round polymer magazine designed specifically for the Heckler & Koch G36. It features an advanced impact resistant polymer construction and an easy to disassemble design with a flared floorplate for positive magazine extraction from pouches. The PMAG 30G utilizes a resilient Mil Spec black oxide coated stainless steel spring for corrosion resistance and an anti-tilt, self-lubricating follower for increased reliability. It is compatible with GEN M2 MOE PMAG floor plate accessories.

The PMAG 30G MagLevel features transparent windows on both sides of the body and has a painted indicator on the spring for quick determination of approximate rounds remaining in the magazine. Compatible with all 5.56x45mm Heckler & Koch G36 variants, excluding the semi-auto U.S. marketed SL8.

PMAG 30 AUS GEN M3 WINDOW -STEYR AUG

5.56X45 NATO

The PMAG 30 AUS GEN M3 Window is a 30-round 5.56x45 NATO polymer magazine for Steyr AUG/F88/F90 compatible weapons that features transparent windows to allow rapid visual identification of approximate number of rounds remaining. Similar to the GEN M3 PMAG for the AR15/M4, the PMAG 30 AUS features a long-life USGI-spec stainless steel spring, four-way anti-tilt follower and constant-curve internal geometry for reliable feeding, and simple tool-less disassembly to ease cleaning. In addition, low profile ribs and aggressive front and rear texture gives positive control in all environments, and a paint pen dot matrix has been added to the bottom panel of the body to allow easy marking by the end user for identification. The easy to disassemble GEN M3 flared floorplate aids in extraction and handling, and is slimmer than factory Steyr floorplates for better fit in magazine pouches.

STOCKS

& STOCK ACCESSORIES

EVERY MAGPUL STOCK IS DESIGNED WITH THE SAME RIGID ADHERENCE TO QUALITY AND DESIGN. WITHIN THAT PHILOSOPHY, A WIDE VARIETY OF DIFFERENT REQUIREMENTS MUST BE MET, WHICH HAS LED TO THE DEVELOPMENT OF A BROAD AND EVER-EXPANDING STOCK LINE.

In 2002, the M93 Carbine Stock, as a part of Magpul's Modular Stock System, added mission customization to what was previously a one-size-fits-all application on the M16 and M4 platforms. Designed to provide a static, continuous, repeatable cheek weld instead of one that moved with the stock on the buffer tube, it was a replacement for previous issued AR stocks. Purchased by then USMC Force Recon units to replace the factory stocks, the M93 represented the beginning of a lineage of mission-oriented stocks that meet unique shooter needs through innovative features, rugged construction and a uniquely Magpul style. With consumer demand on the rise, Magpul sought to provide innovation in a space where military-inspired needs crossed paths with civilian usage of the AR platform in the early 21st Century.

The Magpul PRS followed the M93 and brought full-featured precision capabilities that could adapt to individual needs. It was soon followed by the CTR and the UBR, which greatly expanded the depth and strength of the stocks line. The release of the UBR,

which included a variety of the M93's features on a more robust body and lockup system, provided an all-around upgrade for the military-use customer that also appealed heavily to the commercial market. The CTR incorporated a completely new polymer material composition that provided the muscle behind Magpul's follow-on AR stocks, making them stronger and more capable tools that proved to be more durable than other industry solutions. The CTR also utilized a shielded operation lever and a friction locking system that secured the stock to the buffer tube for minimal movement, and this sort of attention to features and details led the way to a variety of other AR stock options. Some, like the ACS, ACS-L and STR focused on storage. Others, such as the MOE line helped make the strengths of the Magpul line more accessible to both OEM firearms manufacturers and those looking for a simpler, more affordable solution. Other stocks were designed to be even more streamlined, with stronger and more sleek lines, such as the SL, the SL-S, and the SL-K, and our offerings have expanded to other platforms as well.

No matter the title or their primary function, Magpul's stocks have brought the combination of strength, durability and performance to bear on multiple customer needs for years, while also bringing a style and design that is both the industry standard and unique at the same time. Even though our line of stocks is vast, we're far from done.

UBR GEN2 COLLAPSIBLE STOCK

AR15/M4/AR10/SR25/M110

The UBR GEN2 is an adjustable stock for AR15/M4 and AR10/SR25 platforms designed to offer the same strength and stability as a fixed stock with a consistent and comfortable cheek weld in any position. An update of the revolutionary Utility/Battle Rifle (UBR) stock, the UBR GEN2 features a fixed cheek piece to provide a consistent cheek weld in any of its 8 positions. The included receiver extension is compatible with both carbine and A5 length buffer systems. Designed to accommodate largebore AR calibers and withstand severe impacts, the UBR comes standard with front and rear QD sling attachment points, a recessed footman's loop, the ergonomic MOE SL angled-toe rubber butt-pad, and storage compartment. Receiver extension included.

PRS GEN3 RIFLE STOCK

AR15/M4/AR10/SR25/M110

The PRS GEN3 is a field precision stock for AR15/M16 and AR10/SR25 platforms, featuring toolless length of pull and cheek piece height adjustment. Adjustable for length of pull and cheek piece height via aluminum detent knobs, the PRS GEN3 (Precision Rifle/Sniper) stock is intended for semi automatic sniper or varmint type rifles. Optimized for installation on rifle-length, Mil Spec carbine, and A5 length carbine receiver extensions and includes a cant/height adjustable rubber butt-pad and rotation-limiting QD sling cups as well as M-LOK slots on the bottom for rear monopod mounting.

MOE SL-S CARBINE STOCK

MIL SPEC RECEIVER EXTENSIONS

The storage-capable version of the flagship Magpul MOE SL carbine stock, the MOE SL-S (Storage) Stock is a direct replacement buttstock for AR15/M4 carbines. The sleek profile, dual-side release latches, and waterproof battery tubes make it the slimmest storage tube stock available. The SL-S provides the enhanced cheek weld and true, O-ring sealed, 10m waterproof storage area desired by many, but fits it into the narrowest package possible to allow a more upright head position and minimize bulk. A rolled toe and angled rubber butt-pad are optimized for use with body armor, and QD sling socket is included. A unique leaf-spring tension system provides a solid fit on Mil Spec receiver extensions, with slightly less friction than the original SL. The MOE SL-S is the most intuitive, comfortable, and efficient storage stock available.

MOE SL CARBINE STOCK

MIL SPEC & COMMERCIAL SPEC RECEIVER EXTENSIONS

The Magpul MOE SL Stock is a direct replacement buttstock for AR15/M4 carbines. Designed for the modern battlefield, the sleek profile, dual-side release latches, rolled toe, and angled rubber butt-pad is optimized for use with body armor or modular gear and provides for efficient shoulder transitions.

MOE SL-K CARBINE STOCK

MIL SPEC RECEIVER EXTENSIONS

Inspired by the XM-177 stock from the earliest models of compact AR-rifles, the Magpul MOE SL-K Stock is a direct replacement compact buttstock for AR15/M4 Carbines. Ideal for SBRs, PDW's, and submachine guns, the SL-K is optimized for platforms where size and weight are at a premium. Designed for the modern battlefield, the reduced footprint, shielded dual-side anti-rattle release latches, optional QD sling mounting, rolled toe, and angled rubber butt-pad make it ideal for use on compact weapons and for achieving solid stock placement when wearing bulky armor. The SL-K is not a low-cost alternative to other stocks, it is designed for maximum performance with minimal bulk. (Rear slot in the SL-K allows mounting the M-LOK QD Sling Mount, sold separately.)

MOE SL-K CARBINE STOCK – MIL-SPEC

BLK - FDE - ODG - GRY

MOE

MOE FIXED CARBINE STOCK

MIL SPEC & COMMERCIAL SPEC RECEIVER EXTENSIONS

The MOE Fixed Carbine Stock provides a fixed, non-collapsing stock option for carbine-length buffer tubes. The MOE Fixed Carbine Stock has a slim profile, multiple sling attachment options including integrated sling loops and optional dualside QD mounting points, and is compatible with the ASAP Plate and PRS Extended Rubber Butt-Pad. Installation is non-armorer and does not require the castle nut or lock plate to be removed.

STR CARBINE STOCK

MIL SPEC & COMMERCIAL SPEC RECEIVER EXTENSIONS

The Magpul STR (Storage/Type Restricted) is a drop-in replacement buttstock for AR15/M4 carbines. A storage-capable version of the CTR, the STR has improved cheek weld and two water resistant battery tubes on a compact, reinforced polymer A-frame design. A shielded operation lever and supplemental friction locking system prevent accidental operation and minimize excessive stock movement for enhanced weapon stability and accuracy. The STR incorporates two integral sling loops, a reversible push-button QD sling mount, and a replaceable 0.30" rubber butt-pad which provides positive shoulder purchase to prevent slippage even with body armor or modular gear.

MOE RIFLE STOCK

AR15/M16 RIFLE RECEIVER EXTENSION

The MOE Rifle Stock is a simple, lightweight, cost-effective stock for the AR15/M16 and AR10/SR25 platforms, with an enhanced cheek weld, rubberized butt-pad, and internal storage compartment. The MOE Rifle Stock is a drop-in replacement for A1 and A2 rifle stocks utilizing the standard rifle-length receiver extension (buffer tube) without the A2 spacer. Designed as a basic rifle upgrade, the stock features an improved cheek weld profile, integral 1.25" sling loop, optional dual-side front and rear QD mounting points, replaceable anti-slip rubberized butt-pad, and large internal storage compartment accessible through the rear storage door.

MAGPUL PRO 700

REMINGTON 700 SHORT ACTION

The Magpul Pro 700 rifle chassis is an uncompromising, full featured precision rifle chassis for short action Remington 700 actions and other Remington 700 footprint actions. The Pro 700 combines innovative engineering, precision machining, Mil-Spec quality finishes, and an extensive list of purposeful design features with complete adjustability to provide demanding end users with the most comprehensive available precision rifle platform solution for true out of the box performance. Based on a full billet aluminum skeleton and clad in Magpul polymer for environmental comfort, noise mitigation, and ergonomics, the Pro 700 is also fully ambidextrous. Capable of fitting both right and left-handed actions with the simple swap of a bolt retainer plate, and with a reversible cheek riser and reversible hinge on the folding version, "lefties" haven't been "left out."

HUNTER AMERICAN STOCK

RUGER AMERICAN RIFLE®

Continuing the Hunter lineage, Magpul introduces the Hunter American stock. Made from reinforced polymer and an anodized aluminum bedding block with steel recoil lugs. The Magpul Hunter American stock offers users a cost-effective replacement featuring a fully adjustable length of pull, comb height, and enhanced ergonomics. Compatible with Ruger American Short Action rifles, this stock requires no bedding and is a true "drop-in" solution for the end user. This stock is also M-LOK compatible to accept a broad range of accessories. Included is our Bolt Action Magazine Well and a PMAG 5 7.62 AC which allows the rifle to be used with detachable box magazines without any need for custom inletting.

GRIPS

THE GRIP IS THE MOST IMPORTANT INTERFACE BETWEEN MAN AND MACHINE, MAKING THE “RIGHT” GRIP PREFERENCE A VERY PERSONAL CHOICE.

The grip influences how we interact with the trigger and other controls, and how well and naturally those interactions occur are integral to controlling our firearm and our ability to make hits. Because everyone's hands are different, a grip that fits one hand may not be ideally suited for another, especially in different environments. Magpul sought to create a line of grips that supported these different needs for fit, form and function. The original Magpul grip was the MIAD, which allowed the shooter to mix and match front and back straps for a personalized fit. Later, the line grew to accommodate many different preferences and missions. The MOE Grip was designed based on user input from individuals with very different hand sizes and shapes, providing the angle, size, trigger reach, and texture that still seemed suited for a majority of users at an attractive price. The MOE+ was created in 2011 to provide the same size and shape of the MOE line with an added rubber overmolding over a polymer core to support those who preferred a softer, more “tacky” grip.

From there, the line expanded greatly, with more vertical grip angles for “short stock,” squared-off shooting styles or smaller, PDW-sized firearms in the MOE-K, SL, and MOE K2 and K2+. AK's were included, with MOE, K2, and overmolded variants. Forward grips received attention, as well, with the creation of the original AFG concept, ergonomic, durable vertical grips, and the updates to M-LOK and sleeker form factors over the years that created a full selection of support options that have revolutionized weapons handling and how we think about the non-firing hand and its interface with the firearm.

Though the grip category may represent a simpler challenge to bring a product to market, and thus represents a fairly saturated field, getting it “right” is not as easy. Magpul grips have become a staple on many firearm produced in the last decade, which is testament to Magpul's ability to get this “very personal thing” very right, indeed.

MOE-K GRIP

AR15/M4

The MOE-K Grip provides an extremely low profile and compact design with a steeper grip angle compared to more traditional styles. The more vertical grip angle is optimized for use on PDW (Personal Defense Weapon) configurations and improves comfort and control on short LOP rifles that bring the primary hand in closer to the shooter's body. The thin profile and lack of backstrap 'beavertail' also makes it an excellent choice for shooters who prefer a smaller grip circumference for the AR15/M4 pistol grip. The MOE-K Grip is not compatible with Grip Cores.

MOE-K GRIP
MAG438
BLK - FDE - ODG - GRY

MOE SL GRIP

AR15/M4

Similar to the MOE-K2, the MOE SL Grip (Magpul Original Equipment Slim Line) is a drop-in upgrade for AR15/M4 pistol grips with a more vertical grip angle optimized for short LOP weapons that bring the primary hand in closer to the shooter's body. With an aggressive new texture for positive weapon control along with excellent ergonomics, the SL Grip provides a slightly smaller size and slimline feel. The MOE SL Grip is not compatible with Grip Cores.

MOE GRIP

AR15/M4

The MOE Grip provides Magpul quality, feel, and durability in an economical, drop-in upgrade for the standard AR15/M4 pistol grip. The ergonomic, hand-filling design combines aggressive texturing with storage core capability. One-piece reinforced polymer construction provides the durability needed to withstand operational environments. The MOE Grip accepts optional storage cores for gear stowage.

MOE-K2 GRIP

AR15/M4

The MOE-K2 is a drop in upgrade for AR15/M4 pistol grips with a more vertical grip angle optimized for short LOP weapons, such as PDW (Personal Defense Weapons) configurations. It has an aggressive texture for positive weapon control and is compatible with Magpul Grip Cores for storage customization.

MIAD GEN 1.1 GRIP KIT

TYPE 1 & TYPE 2

The MIAD (Mission ADaptable) Grip is a drop-in replacement for standard grips, and is available in both 5.56 and 7.62 configurations. It is designed to improve ergonomics with an aggressive texture for positive weapon control and interchangeable front and rear straps for personalized hand fit, and is compatible with all Magpul Grip Cores. The new MIAD Grip also comes with the newest grip core; a lubrication bottle storage core (empty bottle included). Fitment chart available at www.magpul.com.

M-LOK AFG

ANGLED FORE-GRIP

The M-LOK AFG is an M-LOK compatible update of the original Magpul AFG and AFG-2, the original products that changed the way shooters think about forend grips. A new radiused curve grip area allows greater freedom in placement of the M-LOK AFG on the hand guard while still maintaining correct wrist angles and ergonomics. A streamlined, minimalist design molded of our reinforced polymer material creates a one-piece, high strength grip that weighs a mere 1.2 ounces including hardware. The M-LOK AFG is 3/4" shorter than the AFG-2 while maintaining a similar gripping surface area for a smaller mounting footprint on hand guards with just as much room for the shooter's hand. The forward finger index, similar to the original AFG, provides additional options in gripping and hand placement, while a contoured rear surface allows placing the M-LOK AFG directly in front of an M-LOK MVG for a combination that provides even more versatility.

AFG

ANGLED FORE-GRIP

Unlike conventional vertical fore-grips, the Magpul AFG (Angled Fore-Grip) takes into account natural body mechanics and provides a comfortable and stable user interface that reduces fatigue and allows for more precise weapon control. By positioning the shooter's hand high on the centerline of the bore, the AFG helps mitigate recoil and control the weapon, facilitating faster, more accurate follow-up shots.

AFG ANGLED FORE-GRIP
MAG411
BLK - FDE - ODG - GRY

AFG-2

ANGLED FORE-GRIP

Taking into account body mechanics and ergonomic considerations, the AFG-2 provides a forward grip/index point that reduces shooter fatigue and enhances weapon control. Slim line design and small size allows for compatibility with a wide variety of rail systems, rail covers, and accessory mounts. The AFG-2 features a three-piece design with an interchangeable finger shelf that allows for a flat "A1-style" surface or an "A2-style" finger nub, depending on shooter preference. It mounts on standard 1913 Picatinny rails.

HAND GUARDS, FORENDS, RAILS & ACCESSORIES

PROPERTY OF SA DEFENCE

MOE SL HAND GUARDS

AR15/M4

The MOE SL Hand Guards for AR15/M4 firearms for both carbine and mid-length gas systems provide modular flexibility with M-LOK accessory slots in a lightweight, slim line, cost effective design. Designed with versatility in mind, slots at the two, six, and ten o'clock positions allow the attachment of optional Picatinny rail sections and other direct attach accessories for the mounting of tactical lights, slings, grips, etc. Reinforced, heat-resistant polymer construction provides operational durability without the weight and expense of an aluminum rail hand guard. Large front extensions and lower lip provides additional operator protection from hot front sight assembly. For use with A2 fixed front sight assembly.

ZHUKOV-U HAND GUARD

AK47/AK74

The Zhukov-U Hand Guard shaves off 1.5" from the original Zhukov AK Hand Guard to accommodate shorter barreled rifles and pistols, and keeps the front end of full length rifles a little more lively. The shorter version also allows us to accommodate the military issue cleaning rods, so you don't have to give that up to get the benefits of the Zhukov anymore! The Zhukov-U shares the same type of sturdy aluminum chassis as the longer standard Zhukov for strength and heat mitigation sheathed in a comfortable, injection molded exterior for superior ergonomics. The Zhukov-U includes M-LOK slots for accessory attachment, and is fully compatible with the UltiMAK gas tube rail. Installation requires removing handguard retainer. Made in U.S.A. Hand Guard counts as one US compliance part for 922(r).

MBUS SIGHTS

MBUS FRONT & REAR

1913 PICATINNY RAILS

The MBUS (Magpul Back-Up Sight) is a low-cost, injection molded, folding back-up sight. The MBUS Front Sight is adjustable for elevation, features a built-in spring-loaded front sight post detent, and fits all Milspec 1913 Picatinny rail-equipped weapons, but is specifically tailored to the AR15/M4 platform. Front sight adjustment tool and all mounting hardware included.

Note: Due to the nature of polymer construction, the MBUS is not compatible with railed gas blocks and must be mounted to a railed forend.

The MBUS (Magpul Back-Up Sight) is a low-cost, injection molded, folding back-up sight. The dual-aperture MBUS Rear Sight is adjustable for windage and fits all Milspec 1913 Picatinny rail-equipped weapons, but is specifically tailored to the AR15/M4 platform.

MBUS PRO FRONT & REAR

1913 PICATINNY RAILS

The MBUS Pro Front is a corrosion resistant all-steel back-up sighting solution that delivers maximum functionality and strength with minimum bulk at a price that's even smaller than its size. The no-tool, elevation adjustable front sight excels in all 1913 Picatinny rail mounting applications, including rail-height gas blocks. Positive detents keep the MBUS Pro Front at standard AR sight height when deployed, and so low when they are stowed that you'll never notice them until they're needed. The narrow width front is compatible with most IR aiming laser and light installations for the professional user.

The MBUS Pro Rear is a corrosion resistant all-steel back-up sighting solution that delivers maximum functionality and strength with minimum bulk at a price that's even smaller than its size. The dual aperture, windage adjustable rear sight is contoured to fit seamlessly on the tail end of AR15/M4 receiver 1913 Picatinny rails to avoid charging handle interference. Positive detents keep the MBUS Pro Rear at standard AR sight height when deployed, and so low when they are stowed that you'll never notice them until they're needed.

MBUS PRO LR

1913 PICATINNY RAILS

The MBUS Pro LR capitalizes on the low profile and sleek styling of the original MBUS Pro, while adding the additional feature of elevation adjustments to accurately engage targets at variable distances. Built with all steel construction, this is the sighting solution that delivers no-tool adjustments, maximum strength, corrosion resistance, and functionality in a compact package. Positive detents keep the MBUS Pro LR at standard AR sight height when deployed and so low when stowed that you will hardly notice them.

MBUS PRO LR - FRONT
MAG527
MELONITE FINISHED STEEL

MBUS PRO ENHANCED FRONT SIGHT POST

The MBUS Pro Enhanced Front Sight Post is an upgrade for older MBUS Pro and MBUS Pro Offset Front Sights. Featuring a rectangular cross-section, the MBUS Pro Enhanced Front Sight Post offers the user the option of a 0.040" Match profile for precision shooting or a standard 0.060" profile for visibility without changing posts. Simply raise the post until it spins freely and rotate 90-degrees to present the other sight profile, then lower the post to its original position and confirm zero. The Match width side of the post has a marking dimple for easy identification during installation. Precision machined of alloy steel, the sight post features a Mil Spec manganese phosphate finish for corrosion resistance.

SLINGS & ADAPTERS

SLINGS AND THINGS: OUR JOURNEY TO THE BEST POSSIBLE SOLUTIONS TO HANDS-FREE RIFLE RETENTION.

In the beginning, there was the original Multi Mission Sling System, the MS2. Magpul's entry into the sling market in 2009 provided the ability to transition between a two point and a single point sling and to adjust length rapidly. By 2011, an upgrade to the hardware to paraclips and a change in webbing was released as the MS3. The new webbing used a proprietary weave that was highly durable, extremely abrasion resistant, and moved easily over gear without being too slippery. The new MS3 incorporated a quick adjusting loop similar to the MS2 for transitions, with a later adaptation called the MS3-QD arriving not long after that included both paraclip and QD attachments. The MS4 followed with dual QDs and a center section that accommodated the 2-1 functionality with the QD hardware. These progressive changes stood out as advances in the slings market, but further innovative changes were coming that would completely change the sling industry.

By 2014, Magpul had developed a new way of adjusting its slings with the MS1 slider. Faster, slimmer, and easier to manipulate, the MS1 slider held the sling settings securely, even under heavy loads, and it provided rapid sling adjustments without having loose tails, loops, or other solutions that could get in the way, as was the case with other adjustable slings. As it is the "one" sling to form the foundation of all our options, Magpul's current sling category is now completely based on the MS1 dedicated two

point sling combined with the innovative MS1 slider. As were its predecessors, the MS1 is also single point configurable, in this case by simply adding the appropriate one point adapter that works with a variety of hardware options, or by purchasing this capability as a complete MS3, MS3QD, or MS4 in the Gen 2 form.

Also released in 2014, the MS1 padded sling offered the same strengths of the MS1 sling system and the comforts of a padded sling with none of the traditional failure points. By using a single piece of tubular variable width webbing, Magpul eliminated the need to stitch a section of pad onto or around the sling, a technique that is unmatched to this day.

Along the way, Magpul introduced numerous pieces of attachment hardware to solve virtually any sling connection conundrum on any firearm, and also the QDM, an improved quick-detach sling swivel option that offered more strength and durability than other traditional push-button QD attachments, as well as easier, more intuitive operation.

Most recently, 2018, Magpul took a back-to-basics tack and introduced the Magpul RLS sling, which combined the best features of Rhodesian and 1907 match-style slings with the qualities and strengths of Magpul's famous proprietary nylon webbing and high-strength polymer hardware.

Today, Magpul is one of the largest sling manufacturers in the world, converting many, many miles of webbing into our sling products each year with CNC sewing operations right here in the US, and polymer and steel hardware featuring the same Magpul design and know-how as the rest of our line.

CONFIGURING THE MS1 SLING

FOR ALL SLING ADAPTERS
SEE PAGE 92-93

MS1 SLING

MULTI-MISSION SLING SYSTEM

The MS1 sling is the most versatile addition to the Magpul line of rifle slings. This sling system starts with an optimized, dedicated two-point sling that serves equally well in a one-point role when using optional adapters. Based on our MS1 slider, this system provides rapid adjustments to either lengthen or shorten the sling with no slipping once set, and no tails, loops, or other potential snag hazards. In a two-point role, the MS1 allows easy shoulder transitions, rapid adjustability for hands free rifle carry and shooting support from various positions. The MS1 system also has a series of adapters that are sold separately and are based on the MS3 and MS4 slings. By adding the appropriate adapter (available in Paraclip or QD) for the sling, you can easily add one-point function to your MS1.

In testing, the sling had to survive tens of thousands of cycles in wet, dry and sandy conditions, static load testing without slippage for 72 hours and weighted 6 foot dynamic drop tests. In addition to the controlled lab tests, we also swam it, jumped it, hunted with it, hiked into the mountains with it, and most importantly shot with it in a variety of rugged field conditions.

MS1 SLING
MAG513
BLK - COY - RGR - GRY

MS1 PADDED SLING

MULTI-MISSION SLING SYSTEM

The MS1 Padded Sling, is an optimized, dedicated two-point sling that serves equally well in a one-point role when using optional adapters and also provides all the comforts of a padded sling with none of the failure points. By using a single piece of hollow variable width webbing, we have eliminated the need to stitch a section of pad onto or around the sling. Additionally, by using high grade foam for the padded insert, you can rest assured that it won't absorb moisture. The pad is also held in place with a unique stitching pattern that ensures it will never shift or bunch up in the webbing. Being built around our MS1 slider, this system provides rapid adjustments to either lengthen or shorten the sling with no slipping once set, and no tails, loops, or other potential snag hazards. In a two-point role, the MS1 Padded sling allows easy shoulder transitions, rapid adjustability for hands free rifle carry and shooting support from various positions. The MS1 system also has a series of adapters that are sold separately and based on the MS3 and MS4 slings. By adding the appropriate adapter (available with Paraclip or QD Sling Swivel) for the sling, you can easily add one-point functionality to your MS1.

MS1 PADDED SLING
MAG545
BLK - COY - RGR - GRY

MS1 QDM SLING

The Magpul MS1 QDM Sling further enhances one of the most versatile line of rifle slings by including factory-installed Magpul QDM quick-disconnect swivels at a significant cost savings. As a heavy-duty replacement for the typical push-button swivel, the Magpul QDM offers an innovative low-profile design, single-handed manipulation, superior corrosion-resistant Melonite finish and a high-strength, freely rotating bale that canalizes sling webbing to prevent rollover. This sling system not only provides the strength, speed and security of Magpul QDM hardware but is optimized for dedicated two-point sling functionality built around the streamlined MS1 Slider. Once set, this system allows for rapid adjustments to either lengthen or shorten the sling without slippage and no tails, loops or other potential snag hazards. In a two-point role, the MS1 allows seamless shoulder transitions, fast adjustability for hands-free rifle carry and shooting support from various positions. The Magpul MS1 QDM Sling retains all of the original MS1 functionality and is still fully adaptable for one-point applications with a series of adapters (sold separately) based on the MS3 and MS4 Slings. The Magpul MS1 QDM Sling is made in the U.S.A. and is fully Berry Amendment compliant.

MS1 QDM SLING
MAG939
BLK - COY

MS4 QDM SLING

Quickly reconfigurable between one-point and two-point configuration, the Magpul MS4 QDM Sling enhances the proven MS4 Dual QD Sling GEN2 by including factory-installed Magpul QDM quick-disconnect swivels. As a heavy-duty replacement for the typical push-button swivel, the Magpul QDM offers an innovative low-profile design, single-handed manipulation, superior corrosion-resistant Melonite finish and a high-strength, freely rotating bale that canalizes sling webbing to prevent rollover. This sling system not only provides the strength, speed and security of Magpul QDM hardware but maintains compatibility with the standard QD sling cup interface found on many handguards, lower receivers, receiver end plates and buttstocks. The Magpul MS4 QDM Sling is made in the U.S.A. and is fully Berry Amendment compliant.

MS4 QDM SLING
MAG953
BLK - COY

MS3 SLING GEN2

Optimized for use with the ASAP and RSA or MSA and M-LOK QD Sling Mount the MS3 can switch quickly between one-point and two-point configuration. Made from custom nylon webbing chosen for its comfort and strength, and now with the MS1 slider, the MS3 is easily adjustable for shooter size and preference. It also features a light weight, heavy duty, polymer and steel Paraclip to allow easy manipulation in emergency situations.

MS3 GEN2 SLING
MAG514
BLK - COY - RGR - GRY

MS3 SINGLE QD SLING GEN2

Filling the same mission requirement as the standard MS3, and now with the MS1 slider, the MS3-QD can quickly switch between one-point and two-point configuration. The MS3-QD maintains material construction and specifications identical to that of the standard MS3, but features a heavy duty push-button QD sling swivel for the one-point (rear) weapon attachment rather than the Magpul Paraclip found on the standard MS3. This modification allows compatibility with QD sling cups commonly found on lower receivers, receiver end plates, and buttstocks.

MS3 SINGLE QD GEN2 SLING
MAG515
BLK - COY - RGR - GRY

MS4 DUAL QD SLING GEN2

The MS4 Sling is a Dual QD version of the standard MS3 Sling. With push-button QD Sling Swivels in place of the standard Paraclips, and now with the MS1 slider, the MS4 provides a two to one-point convertible sling option compatible with front and rear QD attachment points.

MS4 DUAL QD GEN2 SLING
MAG518
BLK - COY - RGR - GRY

RLS SLING

Building on the heritage and proven performance of Magpul's MS Sling series, the Magpul RLS (Rifleman Loop Sling) is a durable, lightweight, and affordable shooting aid and retention device. Combining the best features of Rhodesian and 1907 match-style slings, the RLS was created with Magpul's famous proprietary nylon mesh webbing and high-strength polymer hardware.

MAGPUL SUPPRESSOR COVER – 5.5"

SUREFIRE SOCOM556-RC2

The Magpul Suppressor Cover is the first product of its kind able to stand up to the temperatures of extended strings of semi-automatic and automatic fire and still protect the user against burns while also keeping internal can temperatures at safe levels and keeping cool-off times short. A High temp silicone sleeve over a raised stainless steel heat shield mounted to the suppressor body with steel clamps that minimize heat transfer combine to keep external cover temps up to 1000 degrees cooler than the surface of the suppressor, while allowing high volumes of cooling airflow to avoid retained heat and the damage it can cause. Withstands USSOCOM suppressor abuse requirements and numerous cycles of suppressor surface temperatures over 1300 deg F with ease, while allowing you to sling your rifle without burns or melted clothing. The Magpul Suppressor Cover is also an enhanced thermal insulator and signature reduction device which significantly reduces negative visible mirage effects to sight picture, mitigates external suppressor body impact damage and reduces accidental contact injury or other heat related damage to personnel or equipment during weapon firing or during cooldown. Optimized for 1.5" outer diameter round suppressors with body length (not including attachment hardware/interface) approximately 5.5", such as the SUREFIRE SOCOM556-RC2. Other lengths coming soon.

APPAREL & GEAR

WHY?

Some of the more frequent questions and comments we hear relate to some confusion over why we have expanded into some of the categories that you see in our apparel and accessories collections. Each subsection has its own set of reasons, of course, and those reasons vary, but a common theme is that we are constantly looking for new areas where we can add value or explore. These products represent things that we use in our lives and areas where we think we can bring additional value to our customers who think like we do. Whether it's something you wear or something you use to protect your stuff, we've built in the same Magpul problem-solving approach to your everyday needs.

Our apparel and gear include custom designed tees, hats, and other apparel that show your commitment to the brand or that you share our somewhat twisted sense of humor; gun belts that are the best of breed and support your concealed carry, last forever, and

won't make you look like you've just stepped off of the tactical elevator; eyewear that adds style and serious protection that you can use in every part of your life; and our rugged gloves that help you get the job done while protecting you and your equipment. Our DAKA collection of pouches, wallets, and cans help organize and protect your personal gear from whatever it is that you do in your day-to-day activities, and our phone cases continue to provide impressive protection for your phones at incredibly reasonable prices.

Our tees, gloves, belts, headwear, DAKA and other accessories that carry the Magpul name share the same inspirations as our engineered goods. We believe they're complementary to our other product categories, and although it's not necessarily the same folks working on the different product lines, we strive to have all of our products follow the same strict design, material construction, and manufacturing principles that you have come to depend on from Magpul.

TEJAS GUN BELTS

The Tejas Gun belt line started with the idea that you shouldn't have to wait months for a custom gun belt, or pay more for something that doesn't live up to the gun belt task. Our approach has been to apply the traditional leather crafting techniques available to us here in Texas, combining that with modern materials and manufacturing methods, to create what we believe to be the best gun belts available. What we found out was that by doing this we were not just making a great gun belt... we were making a great belt.

CONSTRUCTION

Each of the styles in our Tejas gun belt line feature individual strap constructions engineered for the specific uses of each style. El Original uses a top grade bullhide leather exterior and supportive but flexible reinforced polymer interior that make it a perfect all-purpose gun belt. The El Burro our all-purpose, all conditions belt is built of a single flexible layer of waterproof, textured, reinforced polymer material. For a dressier look, the El Impresario is a slightly thinner package of full aniline leather exterior and supportive but flexible reinforced polymer interior.

HARDWARE

All El Original Gun Belts have a removable chrome plated buckle with our own "tool-free" fasteners. El Burro uses a corrosion resistant aluminum buckle and hardware that is removable with a simple twist of a 3/16" hex wrench. The suit appropriate El Empresario features a thinner buckle design and our same "Tool Free" fasteners all Tejas Gun Belts allow you to change your hardware or upgrade any belt that uses a standard 1.25" or 1.5" buckle and two removable screws.

LAYERS

Eight holes with a narrower 3/4" spacing for a wide yet precise adjustment range.

Multiple lengths available from 32-44 inches.

"EL EMPRESARIO"

The "El Empresario," a new addition to the Magpul Tejas Gun Belt line, is crafted from specially selected full aniline leather, hand milled and drum dyed. Like the original Tejas gunbelt this full grain outer layer is backed by a supportive but flexible reinforced polymer. Cut to a narrower 1 1/4" width and just slightly thinner overall, it maintains the gun belt rigidity with dress belt looks and comfort. Still rigid enough to carry a holster, but with increased comfort for everyday use while retaining it's stretch and sag free performance.

"EL EMPRESARIO"
MAG779
BLACK - CHOCOLATE LIGHT BROWN - BLUE GRAY

"EL ORIGINAL" 1.25 INCH

Similar to our first Tejas Belt, the "El Original", this 1.25" variant is for those who desire a slighter slimmer version that can still handle the weight of a full size pistol. Crafted from a combination of inch-and-a-quarter wide top grade bullhide leather and reinforced polymer, it's strong and water resistant, rigid enough to carry a holster, but still comfortable for everyday use.

"EL ORIGINAL" 1.25 INCH
MAG831
BLACK - CHOCOLATE LIGHT BROWN

"EL ORIGINAL" 1.5 INCH

"El Original" is the first belt in the Tejas Gun Belt line by Magpul. Crafted from a combination of inch-and-a-half wide top grade bullhide leather and reinforced polymer, it's strong and water resistant, rigid enough to carry a holster, but still comfortable for everyday use.

"EL ORIGINAL" 1.5 INCH
MAG733
BLACK - CHOCOLATE - LIGHT BROWN

"EL BURRO"

The "El Burro". Our all purpose, all the time belt. Using 100% reinforced polymer construction and all non-ferrous custom hardware, this beast of burden is what you want to be wearing for those more "adventurous" moments in life.

"EL BURRO"
MAG755
BLACK - CHARCOAL - COYOTE

MAGPUL TEJAS BELT HARDWARE KIT

Using the same high quality hardware that comes on our Tejas "El Original" Gun Belt, this hardware kit allows you to change the color of your hardware or upgrade any belt that uses a standard 1-1/2" buckle and two removable screws.

MAGPUL CORE GLOVES

Everything that happens to your gloves is something that doesn't happen to your hands. As the primary way we interact with our environment, our hands are a vital asset. At Magpul, we believe that not only should your gloves protect your hands, they shouldn't hamper your dexterity in the process. Magpul gloves combine intelligent design, exceptional material quality, and uncompromising construction standards to make sure your hands perform, whether you're at the range, in your patrol car, or at the ranch. In addition to our currently available glove line, new models will be available in Spring of 2019 to ensure all your handwear needs are met.

BREACH GLOVES

The Magpul Core Breach Gloves are designed to preserve comfort and dexterity when manipulating weapons, tools and specialty equipment while providing the highest level of protection to the user. Hard knuckle armor and digital pattern reinforced leather palms combine with touch screen capability and articulated hand and finger construction for maximizing protection without sacrificing 'feel'.

FLIGHT GLOVES

Built on the tradition of the first Nomex flight gloves worn by military aviators since the 1960's, the new Magpul Flight Gloves use modern materials, fit and finish to provide comfort, fire resistance and protection. Fitting like a second skin, these touchscreen capable gloves are at home inside the cockpit or out for all highdexterity tasks.

MAGPUL DAKA POUCHES

The Magpul DAKA Pouch, designed to bring organization to the dusty, dirty, and muddy world we work and play in. Made from polymer infused textiles that are welded on all seams and use a genuine YKK water resistant zipper. The construction methods and materials used mean that these pouches are at home in hard use applications like tool storage or bulk storage of your reloaded ammunition as well as lighter duties like organizing your personal electronic accessories. Although these pouches are not 100% water proof (read submersible...) they will keep your items dry under most wet weather situations making them a great choice for most outdoor adventures.

MAGPUL PHONE CASES

The Field Case features a semi-rigid construction to allow snag-free removal from pockets, protection from minor impacts/drops, low profile PMAG-style side ribs for added grip, and single-piece snap-on design for easy installation and removal.

The Magpul Executive Field Case for the iPhone SE is a slimline cover designed to provide basic protection in the field. Made from a flexible thermoplastic, the Executive Field Case features a slim and unobtrusive design, snaps-on for easy installation and removal, and slides easily in and out of pockets without snagging.

The Bump Case features a semi-rigid construction to allow snag-free removal from pockets. Two-material construction combines a hard protective shell with an inner shock absorbing layer, low profile PMAG-style side ribs for added grip, and single-piece snap-on design for easy installation and removal. The Bump Case has the benefits of a rigid-shell/semi-rigid liner without adding unnecessary bulk.

Designed and manufactured in the U.S.A.

PRECISION RIFLE DATA BOOK 2.0

Previously available only through enrollment at a Magpul Core PR course, the Magpul Precision Rifle Data Book uses a simplified density altitude based, color-coded chart to record your rifles' data across a wide spectrum of shooting conditions. Using a rugged, all weather material that can be written on using map pens, pencils, and non-permanent markers, this data book was designed to perform in austere conditions. Recorded data can also be erased with alcohol based substances, returning the material to its original state. All pages are reusable and include a field expedient density altitude calculator, cold bore shot tracking log, known distance data confirmation pages, range cards, a point of impact shift tracker, and simple hasty hold formulas. Ring not included.

MAGPUL CORE PRECISION RIFLE DATA BOOK 2.0
DYN036
7.0" H X 5.0" W

PRECISION RIFLE QUICK REFERENCE CARDS

Previously available only through enrollment at a Magpul Core PR course, the Magpul Quick Reference Cards offer the shooter a comprehensive overview of the fundamentals of marksmanship, quick reference range estimation sheets, checklists for building shooting positions, aids for the observer, and aids for reading wind. Using the same density altitude system and rugged, all-weather, erasable material as the Precision Rifle Data Book, the Quick Reference Cards offer streamlined access to your rifles' elevation and wind data. Conveniently sized for use in an arm board, your data will always be within reach. Ring not included.

Intended for use as a medium to transfer data for a given rifle from the PR Data Book to these cards for use in the field.
