HIGH THREAT CONCEALMENT

PROPERTY OF TSA DEFENCE

2018 | PRODUCT OVERVIEW

HTC
High Threat Concealment

why HTC?

From everyday concealment to professional use in high threat environments, High Threat Concealment™ offers scalable carry solutions to keep your critical equipment available and ready at all times.

With a diverse and ever-expanding line of pistol holsters, belts, medical kits, and equipment carriers, HTC™ gear is engineered for the unforgiving reality of hard-use environments beyond the square range. Vacuum-formed to exacting tolerances using the very best thermoplastics from Boltaron®, HTC's process combines engineering and design based on professional experience with top-of-the-line materials to provide our customers equipment they can believe in and count on.

Each HTC™ component is precision formed, hand-finished, and inspected before its final quality check utilizing the corresponding magazine, pistol, or handgun with weapon-mounted light for a particular holster or carrier. This process helps ensure that every piece of equipment that leaves our facility will meet or exceed our customer's expectation.

Whether you're providing protective security downrange, serving and protecting our communities on the home front, or a citizen exercising your fundamental right to ensure the safety of your loved ones, HTC™ gear is designed with one purpose in mind - to put the lifesaving tools you depend on comfortably available where you need them, when you need them.

PROPERTY OF TSA DEFENCE

PISTOL HOLSTERS

PROPERTY OF TSA DEFENCE

Thin for concealment, lightweight for comfort, and rugged for real-world use and abuse – HTC™ Holsters are handcrafted using only the highest-grade thermoplastics from Boltaron® with stainless steel mounting hardware for added strength and corrosion resistance.

Spektre™ IWB

HTC's Spektre™ Inside-the-Waistband (IWB) Holster is a no-compromise solution for those who want to comfortably conceal a fighting-sized handgun every day. The Spektre™ provides maximum concealment and a comfortable custom-engineered fit for your weapon that can be worn strong-side IWB or in the appendix (AIWB) position. Each holster can be configured with one of three available attachment systems to better fit your preferred style of carry. Invisible, secure, and always ready.

Spektre™ IWB

CZ P-10 Compact

Spektre™ IWB with Weapon Light

Glock 17 with Surefire X300U-A

Vantage™ OWB

Vantage™ OWB Holsters are available for most popular semiautomatic pistols and can be made to accommodate an ever-expanding variety of weapon-mounted lights, lasers, and red dot optics. Durable belt loops made from injection molded Zytel™ provide offset attachment points to help the holster ride comfortably snug to the body for maximum concealment.

Vantage™ OWB

Walther PPQ M2 5"

Vantage™ OWB with Weapon Light

Smith & Wesson M&P with Streamlight TLR-2

PROPERTY OF TSA DEFENCE

EVO™ Holsters

For those looking for ultimate versatility, the EVO Holster™ provides a singular holster solution that can be configured to run as a belt holster, inside-the-waistband (IWB), or in the appendix position inside-the-waistband (AIWB) by simply reconfiguring the included attachment hardware.

APS™ Holsters

Crafted from rugged 1/8"- thick Boltaron™, HTC's Adaptive Platform Series (APS™) Pistol Holsters are designed for wide-spectrum compatibility with most commonly available attachment platforms and accessories on the market from Safariland®, Blade-Tech™, BLACKHAWK®, and G-Code®. APS™ Holsters are available for many popular semiautomatic handguns from Glock®, Sig Sauer®, Beretta™, as well as for the Smith & Wesson M&P® Series.

One-Piece / Standalone Belts

Whether you're navigating through a typical workday or a course of fire on the range, HTC offers several belt options to make sure your life-saving equipment is always comfortably at hand. The Everyday Low Pro Belt™ or Everyday Tactical (EDT) Belt™ both offer the perfect blend of comfort, function, and durability for daily carry. When worn as an underbelt, the newly redesigned EDT™ belt serves as a quick-attach foundation for any HTC modular gun belt system. For training or duty applications, the Cobra Tactical Riggers Belt (CTR™) or Practical Cobra Belt (PCB™) both provide a rugged 1.75" platform for your gear paired with AustriAlpin's proven quick-release Cobra® buckles.

Two-Piece Belts

HTC's full line of two-piece belts all include a soft Velcro® loop-surfaced underbelt, paired with a Velcro® hook-lined outer belt to provide fast-attach / detach capability with any of our modular gun belt systems. For training and duty use, the Tactical Cobra Belt (TCB) and K9 Handler's Belt (TK9) offer a quick and simple solution for easily attaching and removing your belt system using AustriAlpin's rugged Cobra® Buckles.

Cobra® Belts

Tactical Cobra Belt – Coyote Tan

K9 Handler's Belts

Low Pro Belts

For a reduced tactical profile, HTC's hybrid leather / mil-spec webbing constructed Low Pro Belt is designed for those who wish to conceal their equipment under an open-front cover garment, such as a sport coat or lightweight jacket.

Low Pro Belt – Black

Low Pro Belt – Dark Brown

Crux™ Battle Belt

The Crux™ Battle Belt offers a scalable option that provides the comfort of a traditional battle belt with a slim profile that can still be concealed beneath appropriate cover garments and jackets. Unlike many battle belts that can ride up and down on the waistline during dynamic movement, the Crux™ locks tightly against the body when worn in conjunction with one of HTC's Velcro® underbelts or by using the included (and removable) non-slip Micro Grip insert.

Crux™ Battle Belt

PROPERTY OF TSA DEFENCE

Pistol Magazine Carriers

Worn on their own or as part of a complete modular gun belt system, HTC™ Magazine Carriers fit close to the body, providing the perfect discreet carry option for your spare magazines. Models are available to accommodate most popular handgun, rifle, and sub-caliber carbine or SMG magazines.

Medical Kits & Radio Holders

Blowout Kits

Available with a standard 6.5"x 3.5"x 1.5" pouch or as a slimmer 5.5"x 5.5"x 1" reduced-capacity size, HTC's quick-detach Blowout Kit can be attached to any standard PALS grid using the included QD fork. When worn at the small of the back on any modular belt system, the medical pouch can be removed with a quick pull on the grab handle with either hand.

MODULAR BELT SYSTEMS

PROPERTY OF TSA DEFENCE

High Threat Concealment's modular belt systems offer fully customizable and scalable solutions that can be configured to suit various applications.

HTC
High Threat Concealment

Quick Response System

HTC's Quick Response System™ (QRS™) allows shooters fast access to their most vital gear with a scaled-down alternative to a full Low Profile System. Wear the included underbelt for fast attachment of gear via the Tactical Cobra Belt with hook and loop interface, or attach the included Micro Grip pad to the hook lining of the Tactical Cobra Belt for comfort and stability without an underbelt.

Components are assembled based on user preference, but typically include:

- One (1) HTC™ Vantage™ OWB Holster
- One (1) Magazine Panel setup to accommodate either 2-pistol magazines and 2-rifle magazines, or 4-pistol magazines and 1-rifle magazine
- One (1) Tactical Cobra Belt with Underbelt and Micro Grip Panel

QRS - CZ - P10C
with Dual Pistol / Scorpion EVO Mag Panel

QRS - Glock 19
with Dual Pistol / Dual M4 Mag Panel

PROPERTY OF TSA DEFENCE

Low Profile System

The Low Profile System™ (LPS™) is designed to fit snugly and securely to the body. Equipment is positioned high enough for optimal concealment, yet low enough on the waistline to accommodate most body armor. The LPS™ can be discreetly worn under a light jacket, sport coat, or other cover garment.

Each LPS™ is built-to-order with your choice of pistol holster, radio holder (or accessory panel with pouch), quick-detach Blowout Kit / IFAK, rifle magazine carriers, dual pistol mag carrier, or other equipment carriers based on your requirements.
